WORK EXPERIENCE

Freelance — New York, NY
Web and Digital Marketing Consultant — 06/2016 – Present
- Design and build custom websites for numerous small business owners and individuals
- Lead clients to generate higher income for their businesses by educating them in how to leverage social media and web presence
- Collaborate with graphic designers to create collateral that fits the business branding of websites

AmpThink — Dallas, TX
UI Developer — 05/2019 – 08/2019
- Developed front-end of data-capturing Wi-Fi log-in pages that helped clients increase revenue via targeted advertising
- Fixed cross-browser compatibility issues and bugs of company website built by third party contractor
- Performed QA on WordPress-based menu board and helped sell software to various sporting venues
- Facilitated team transition to Agile by requiring technical and end-user documentation
- Led internal discussion on writing accessible applications to better serve our diverse customer base

Arris — Dallas, TX – Remote
Full-Stack Web Developer — 03/2019 – 05/2019
- Designed and developed the beta of Angular-based app that helps engineers manage fiber optics installations in Europe
- Interfaced remotely with project managers and stakeholders to ensure timely project delivery

Advantage Healthcare Systems — Remote
Web Developer and Designer — 02/2018 – 04/2018
- Redesigned and built internal web tool to support 500 employees across regional offices
- Created wireframes using Sketch App to reduce project risk and to collaborate with stakeholders
- Implemented a data-forwarding technology that reduced sales turnover time and helped marketing team close more sales
